

Introducing a Complete Prenatal Screening Service

In conjunction with Victorian Clinical Genetics Services (VCGS), we now offer *percept* NIPT (non-invasive prenatal testing) at our Melton and Sunbury clinics.

What is *percept* NIPT?

- This simple blood test analyses DNA, comparing all 23 pairs of chromosomes to screen for conditions such as Down Syndrome

When can I have this test?

- This test is available at our Melton and Sunbury clinics.
- You can book your viability/dating ultrasound (anytime from 10 weeks of pregnancy) and NIPT screening test at the same time

How do I book this test?

- You will need an imaging referral form for your scan, as well as a pathology referral from your GP
- We accept referrals from other radiology providers
- Simply call us on 9747 4800 (Melton) or 9744 5344 (Sunbury) to book an appointment

How much will it cost?

- If both the dating scan and NIPT test are done together, we will bulk bill the dating scan*
- The *percept* NIPT scan will cost \$449 (no Medicare rebate available)
- Results will be available to you within 3-5 days

For more information, call us on 9747 4800 (Melton) or 9744 5344 (Sunbury), or contact your GP. Further information about the screening can be found at vcgs.org.au

*Please note: only the 10 week dating scan is bulk billed, further obstetric scans are not bulk billed
