CLINICAL HISTORY / NOTES

CLINICAL INDICATION

- ☐ **12306 - Once every 24 months, for the measurement of two or more sites (including interpretation and reporting) for:**
- (a) Confirmation of a presumptive diagnosis of low bone mineral density made on the basis of one or more fractures occurring after minimal trauma
 - (b) Monitoring of low bone mineral density proven by bone densitometry at least 12 months previously
- ☐ **12312 - Once every 12 months, for diagnosis and monitoring of bone loss associated with one or more of the following:**
- (a) Prolonged glucocorticoid therapy;
 - (b) Any condition associated with excess glucocorticoid secretion;
 - (c) Male hypogonadism
 - (d) Female hypogonadism lasting more than 6 months before the age of 45
- ☐ **12315 - Once every 24 months, for diagnosis and monitoring of bone loss associated with one or more of the following conditions:**
- (a) Primary hyperparathyroidism;
 - (b) Chronic liver disease;
 - (c) Chronic renal disease;
 - (d) Any proven malabsorptive disorder;
 - (e) Rheumatoid arthritis;
 - (f) Any condition associated with thyroxine excess
- ☐ **12320 - Once every 5 years, for the measurement of two or more sites (including interpretation and reporting) for measurement of bone mineral density if the patient is 70 years of age or over, and:**
- (a) The patient has not previously had bone densitometry; or
 - (b) The t-score for the patient's bone mineral density is -1.5 or more;
- ☐ **12321 - Once in a 12-month period, for diagnosis and monitoring of bone loss in a patient at least 12 months after significant change in therapy for:**
- (a) Established low bone mineral density; or
 - (b) Confirming a presumptive diagnosis of low bone mineral density made on the basis of one or more fractures occurring after minimal trauma
- ☐ **12322 - Once every 24 months, for the measurement of two or more sites (including interpretation and reporting) for measurement of bone mineral density if:**
- (a) The patient is 70 years of age or over; and
 - (b) The t-score for the patient's bone mineral density is less than -1.5 but more than -2.5
- ☐ **Patient does not meet Medicare criteria** (ineligible for rebate)

PATIENT INSTRUCTIONS

- Please contact us by phone, fax, email or online to make an appointment.
- For safety reasons, you will be asked a series of questions at the time of booking. Our staff will provide you with preparation instructions relevant to your examination.
- Arrive 10 minutes prior to your appointment at Lake Imaging, unless specified otherwise.
- Bring this referral form, any previous relevant imaging results (films and/or reports) and Medicare / Concession cards.
- If applicable, bring approved Workcover, TAC or insurance claim information relevant to your appointment.
- Please note, holders of current Healthcare, Pension or Veterans' Affairs cards will be bulk billed or charged at a concession rate. For non-concession patients, payment of your account in full is expected on the day of examination (EFTPOS, Visa or Mastercard accepted).
- If you are unable to attend, contact us as soon as possible to avoid a cancellation fee.
